Banking & Financial Services

Agentic AI strengthens trust and resilience across financial ecosystems by minimizing fraud, ensuring compliance, and elevating customer engagement.

Our Capabilities:

- Fraud Detection & Prevention with reduced false positives.
- Compliance & Regulatory Monitoring at scale.
- Smarter Account Collections with predictive insights.
- AI-powered Customer Service Assistants.

Logistics & Supply Chain

From demand forecasting to last-mile optimization, Agentic AI streamlines operations, resolves disruptions, and ensures resilient supply chains.

Our Capabilities:

- Demand Forecasting with adaptive intelligence.
- Automated Client Complaints Resolution.
- Warehouse Optimization through predictive analytics.
- AI-driven Inventory Management.

Pharma & Life Sciences

Agentic AI accelerates drug development, enhances clinical safety, and personalizes research pipelines with deep learning–driven insights.

Our Capabilities:

- Adverse Event Detection in Clinical Workflows.
- Persona-driven Decision Assistants for researchers.
- Mind-map Generation Agents for R&D exploration.
- End-to-End Bioinformatics Pipelines.

Science & Research

Empowering researchers with intelligent assistants that ensure integrity, accelerate discovery, and optimize peer review.

Our Capabilities:

- AI-driven Hypothesis Formulation.
- Research Integrity Verification.
- Smart Peer Review Assistants.
- Reviewer Selection Optimization.

EdTech

Agentic AI personalizes digital learning experiences and automates content creation to help institutions scale learning outcomes.

Our Capabilities:

- Personalized Learner Experience Assistants.
- AI-powered Student Support Systems.
- Automated Assessment Development.
- Accessible Content Creation.

When Agentic AI Gets to Work: Real Client Journeys

Hardship Collections Agent

Delivered scalable financial support automation using conversational AI.

- Streamlined hardship program applications for credit customers.
- Provided real-time dashboards for customer insights and payment plans.
- Reduced call center load while improving customer experience.

Adverse Event Detection

Improved clinical trial safety and compliance with a multi-agent LLM workflow.

- Automated detection of adverse events from trial feedback.
- Models validated, corrected, and summarized results.
- Delivered pharmacovigilance-ready reports for regulators.

CrossRef API Agent

Accelerated publishing and research workflows with AI-driven automation.

- Unified references across multiple data sources in real time.
- Automated research tasks without manual API calls.

- Shortened publishing timelines and minimized errors.

Vendor Intelligence

Optimized vendor management with AI-led data processing.

- Analyzed multi-format vendor data (Excel, PDFs, Docs).
- Automated shortlisting and qualification for tenders.
- Delivered faster, reliable vendor insights for managers.

Ticket AI Assist

Streamlined ticket lifecycle and query management for global artists.

- Automated classification and routing of royalty/metadata tickets.
- Resolved queries like “Why wasn’t my song added to Spotify?”.
- Boosted workflow accuracy and speed.
