Transform data into actionable insights.

Bridge the gap between data and value

Delivering impact with our services

Revolutionized Michigan's education data system, saving \$56M annually

LearningMate Double Line developed the Michigan Data Hub, enabling 95% of school districts to connect, reducing data management costs by \$56M annually. The solution integrated over 20 applications, ensured near real-time access to state assessment results, and created a replicable, centralized infrastructure for streamlined compliance and operational efficiency.

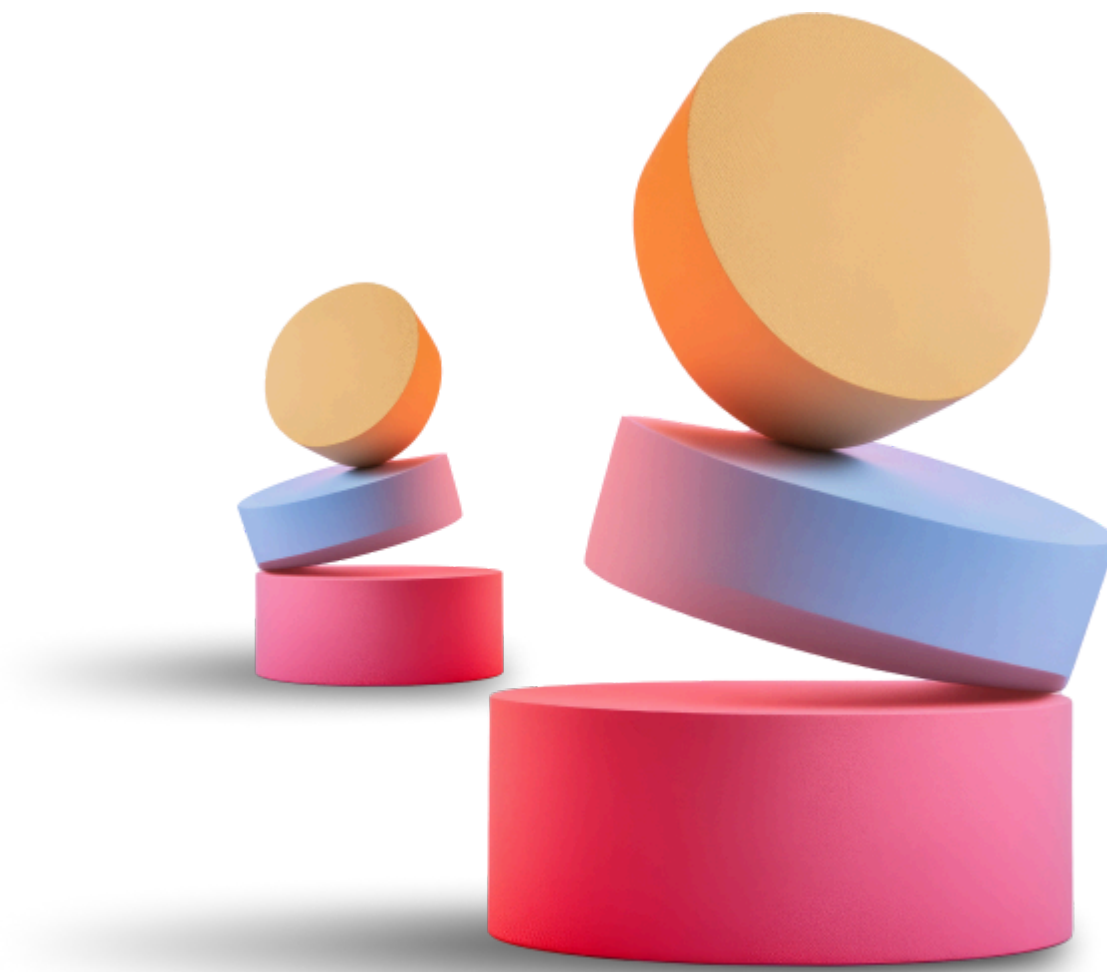

Improved targeted user engagements

We helped a top sporting league client analyze data of millions fans with advanced AI/ML models and drive real-world testing for multiple attributes to improve targeted engagement and fan's lifetime value.

Services that augment your data analytics capabilities

BI, Reporting & Visualization

Transform diverse data signals into meaningful insights and compelling data stories to make informed decisions with certainty. Leverage advanced visualization tools to uncover trends, monitor performance, and drive strategic actions effectively.

Advanced Analytics & Modeling

Anticipate future trends with predictive models, optimize strategies with prescriptive tools, and uncover complex relationships through knowledge graphs to drive smarter decision-making, improved efficiency, and innovative business solutions.

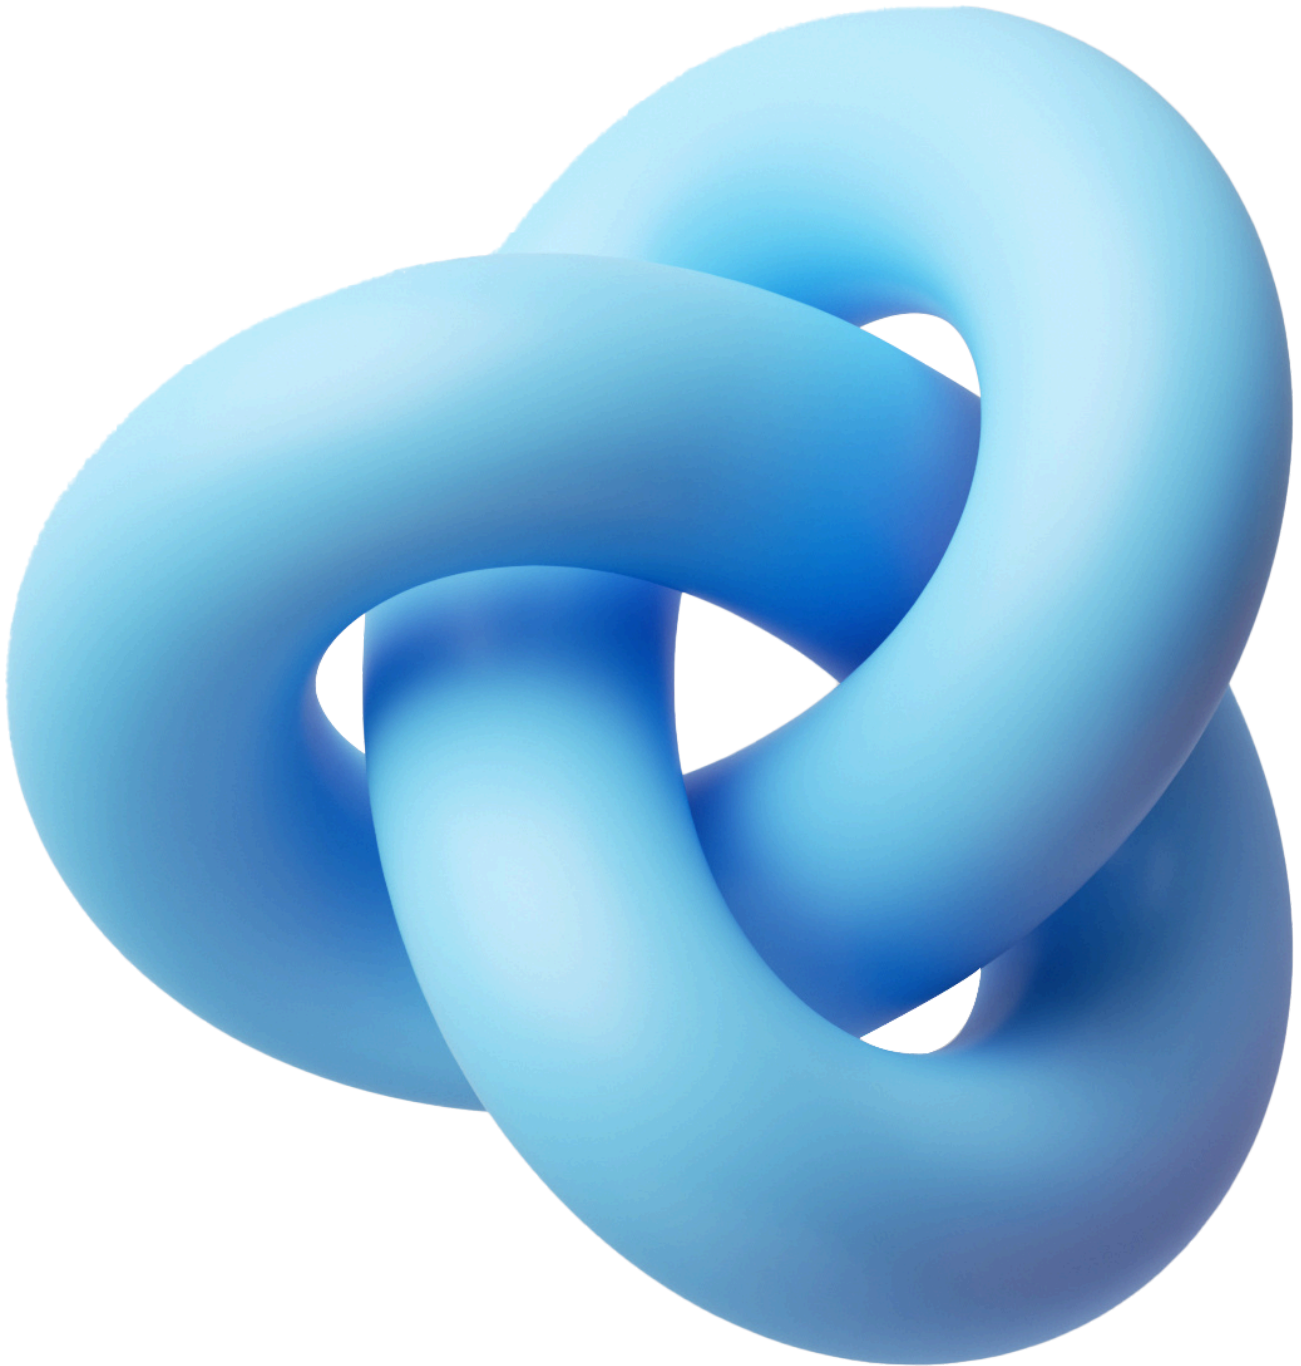

Testing & Monitoring

Build robust, reliable AI and data systems through meticulous pre-production testing and continuous performance monitoring to minimize risks, enhance system stability, and consistently drive high-quality outcomes for your customers.

Domain-Specific Accelerators

Elevate your sales and marketing strategies, optimize risk management, and unlock higher efficiencies through supply chain analytics to enhance outcomes across critical business functions.

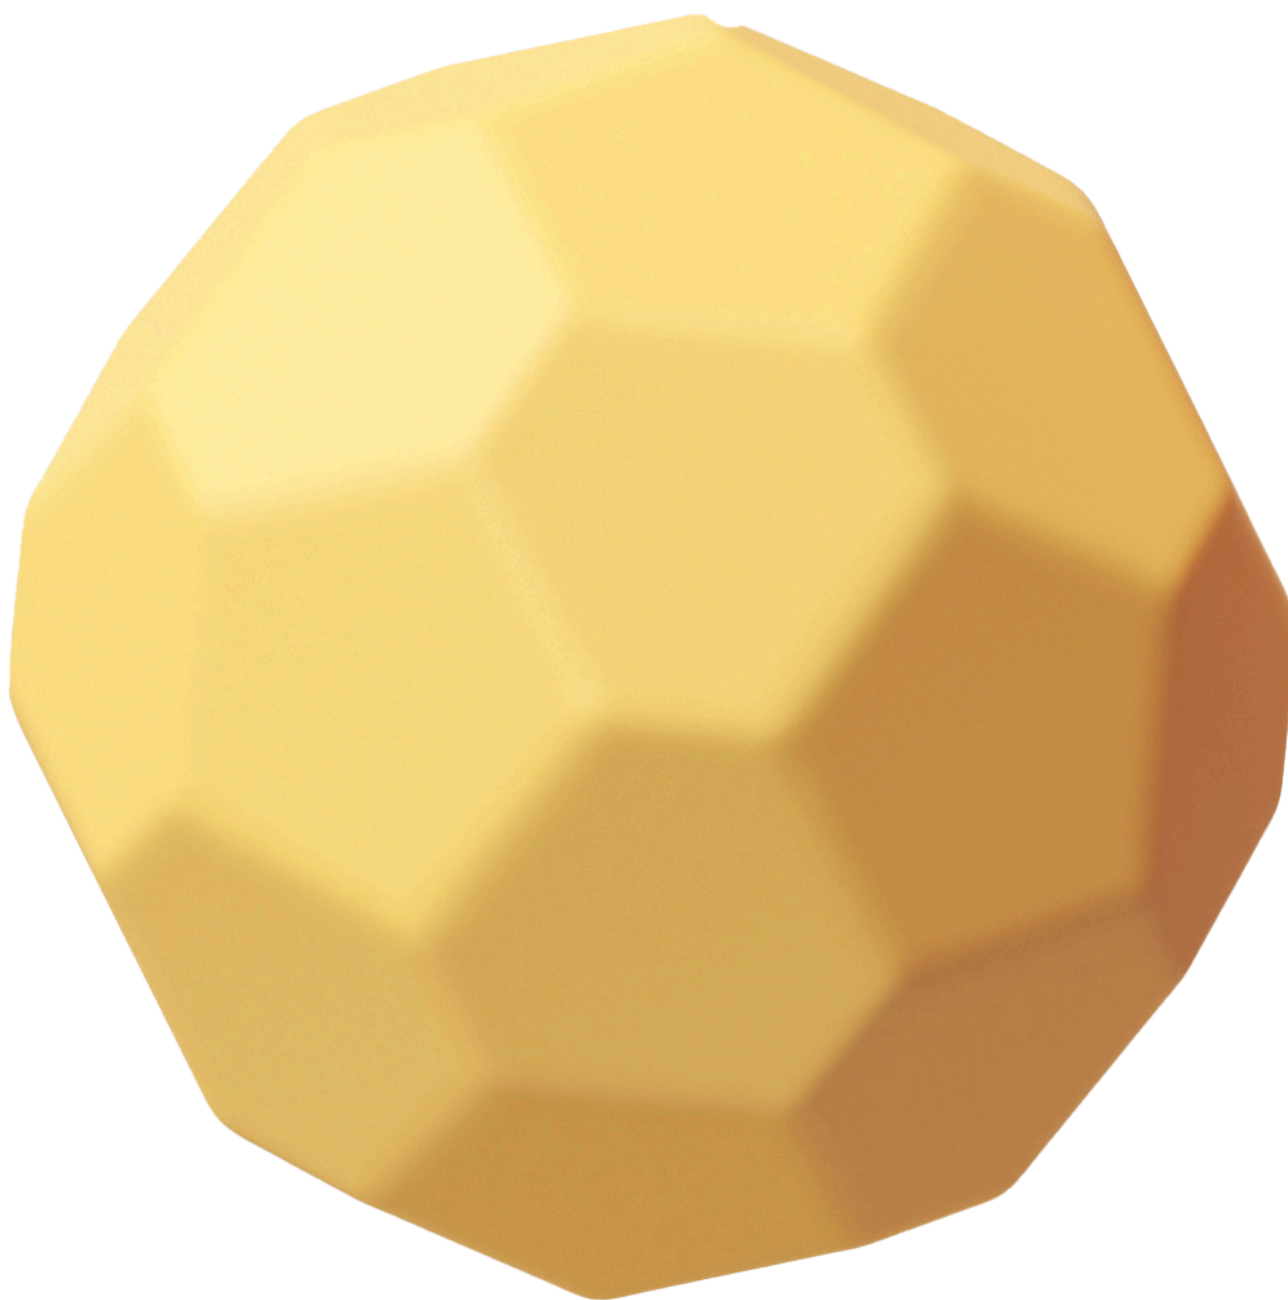

Accelerate your journey to value with pre-built accelerators

Spark.AI - IDP Platform

Spark.AI handles diverse data sources such as websites, emails, and documents, and transforms it into analytics-ready, integratable data for enterprises to gain actionable

insights.

LLM Foundry - Data Playground

LLM Foundry is a sandbox where users can utilize as Citizen AI or for piloting experiments on data leveraging Gen AI.

Gramex - Data Manage

An open-standard collection of low-code microservices that build data solutions faster

Enhancing outcomes for your industry

[Science & Research](#) [Logistics & Supply Chain](#) [EdTech](#) [Financial & Information Services](#)

Streamline research workflows, enhance the precision of findings, and accelerate discovery cycles by leveraging our cutting-edge insights and analytics solutions. Transform your raw data into actionable insights, empowering your teams to

innovate faster and deliver impactful results through better decision-making, operational efficiency, and higher research outcomes. Address the challenges of data integrity, accuracy, and compliance by incorporating AI-led solutions across your value chain

Demand forecasting, inventory optimization, and supply chain visibility are some of the key challenges faced by the industry that impact both productivity and the bottom line. We help you tackle these challenges by integrating real-time analytics and insights solutions into your workflow to achieve higher outcomes across cost minimization, route optimization, inventory planning, and more. With deep insights and predictive capabilities, we help you drive more agile and resilient supply chains, empowering you to meet customer expectations while maintaining a competitive edge.

At Straive, we leverage our data expertise to transform raw educational data into actionable intelligence. It enables you to identify learning trends, measure outcomes, and predict future needs effectively. Integrating these analytics into EdTech platforms allows you to deliver adaptive learning experiences, improve retention rates, and seamlessly align with evolving educational standards. The impact? Higher student satisfaction, operational efficiency, and sustained long-term growth.

In the Financial & Information Services industry, insights and analytics can address critical challenges across real-time data integration, risk management, fraud detection, customer behavior analysis, and more. We apply our expertise in this domain to transform complex financial data into actionable insights, enabling businesses to predict market trends, enhance decision-making, and optimize portfolio performance. Our solutions help you mitigate risks, streamline compliance processes, improve profitability, and strengthen your market position significantly.

At Straive, we understand your challenges, such as integrating and analyzing disparate datasets, predicting drug demand, and ensuring compliance with stringent regulatory requirements. We, therefore, leverage our deep domain expertise to transform raw data into actionable intelligence, enabling faster and more precise decision-making in research, development, and patient care. By embedding advanced analytics into workflows, we empower you to identify patterns, forecast market needs, and streamline clinical operations to build a robust foundation for data-driven healthcare advancements.

Predicting customer preferences, rapidly adapting to changing market conditions, optimizing content, and integrating fragmented data silos are some of the most pressing challenges faced by businesses in the retail tech, entertainment, and media industry.

We help you tackle these challenges by transforming complex data into actionable insights and enhancing customer targeting and engagement strategies. By embedding predictive analytics and pattern recognition into workflows, we enable your business to anticipate market trends, personalize offerings, and improve

operational efficiency. This empowers you to elevate decision-making, enhance consumer experiences, and build a culture of data across the enterprise.

Offering Highlights

Insights as Stories

Global clients accelerating decision-making through compelling data stories and automated narratives.

Visual analytics for actionable insights

2,700 custom-built applications, empowering clients to streamline data interpretation, improving operational efficiency.

Transforming CX With Customer Analytics

Leveraging advanced analytics to deliver personalized experiences

Thought leadership
